PERSONAL PROJECTS

To-do web application (09/2023 - 09/2023)

- A web app that used to maintain our day-day activities or tasks so that we don't forgot some important tasks to do.
- Web app is created using HTML,CSS and JavaScript.
- User can add as many as tasks,once completed he can tick task as completed or even delete the task.
- In this project I have used Google local storage to store data ,so even when a page is refreshed user still access the page.

Android App - Home services (11/2022 - 12/2022)

- A home service app which provide user with booking for cleaning, plumber, Electrician.
- We have added a payment method to book a service.
- Developed using Android studio, Java, MySQL.

Reactjs-Ecommerce App (10/2023 - Present)

- In this project I have react API for fetching details of item for a third party source.
- I have used MongoDB as a database server which Authenticate user by email and password.
